[REC ●]

Opening and Introductions

WORKING GROUP MEDIATOR

Paul Agosta

@paulagosta

FEDRAMP ADVOCATE

Ryan Hodges

@ryan-hodges-gsa

FEDRAMP DIRECTOR

Pete Waterman

@pete-gov

Today's Agenda

- Goals for today
- Opening and introductions
- How we'll work
- Focus for this working group
- Next steps

Goals for today

🎯 Introduce the FedRAMP leads involved in working group

🎯 Explain working group focus and objectives

🎯 Begin discussion to be continued on GitHub

Community Working Group

Mediator

Community working group mediators are FedRAMP representatives responsible for administrative tasks and connective tissue. They will:

- **Provide general working group facilitation**

- **Schedule meetings and post a public calendar**

- **Communicate across working groups leads**

Paul Agosta

@paulagosta

Background:

- 20+ years federal experience (Mil/Ctr/CIV) in Intel/Eng/Cyber
- ISSM exp (Multi-tenant clouds, UAS, EW/SIGINT Platforms)
- Currently supporting FedRAMP Authorization Reviews

FedRAMP Advocate

FedRAMP Advocates are FedRAMP representatives who may drive discussion on specific topics. They will:

- **Answer questions related to how FedRAMP's standards and policies can best be informed by the activities performed in the working group**

- **Clarify FedRAMP's goals and objectives related to the development of standards and policies**

- **Share public prototypes, examples, sample code, etc. developed by FedRAMP to be placed in the public domain**

- **Contribute to the development of additional public prototypes and examples**

Ryan Hodges   @ryan–hodges-gsa

Background:

- 10+ years experience in the private sector as a Data Scientist/ML Researcher
- 10+ years experience in Government (Mil/Ctr) in EW/RADAR
- Currently a Data Scientist at FedRAMP focused on Data Engineering & Automation

How we'll work

For all of our Working Groups:

The purpose of bi-weekly meetings is to recap discussions taking place in GitHub

The Working Group GitHub Repo will be the source of work/truth. This includes:

- All discussions related to the working group
- Development/demonstration of proof of concepts
- Providing a venue for information sharing that may inform updates in guidance
- Development of next working group's agenda
- Meeting minutes and recording
- This is a part of our commitment to operating in public, transparently, in a way that fosters collaboration amongst the variety of stakeholders

The Rev5 Process

Rev5 Agency Authorizations continue and are the <u>ONLY</u> current path to FR Authorization

- Rev5 requirements have not and are not expected to change
- Rev5 process improvements have been significantly deprioritized
- FedRAMP is no longer centralizing continuous monitoring
- All Authorized cloud service providers should transition to collaborative continuous monitoring
  - Host monthly collaborative continuous monitoring meetings
  - Invite relevant agencies to attend
  - Present continuous monitoring findings

Working Group Objectives

This working group seeks to:

- **Understand preferred pathways for transitioning current FedRAMP managed continuous monitoring activities**

- **Identify and share best practices in Continuous Monitoring**

- **Ensure fair and open understanding of potential changes and best practices for legacy authorized cloud services**

The **target audience** for this working group is:

- Cloud Service Providers who are currently FedRAMP Authorized under Rev5

- Agency security teams responsible for oversight of FedRAMP Authorized cloud services

- Third–Party Assessment Organizations (3PAOs)

- FedRAMP Advisors/Consultants

- Anyone within the current FedRAMP review pipeline

FedRAMP is here to facilitate, but the intent is that this is <u>community driven.</u>

Working Group **Next Steps**

- Our next recap will be held on **14 April at 1 PM EST.**

- If you are interested in bringing forward a topic to this working group, post in the discussion forums
  - **<u>This is NOT an opportunity for product pitches</u>**

- **Transition to GitHub**

Any Questions?
